
2202013 TECHNICAL MACHINE SHEET

Product: Brewhouse Huppmann 410 hl / brew
Product number: 2202013
Manufacturer: Huppmann
Manufacturer's type: Brew house
Manufacturing year: 2000
Capacity: 410 hl/brew, 12 brews per day
Status: Possible to test
Condition: Good

Pictures:

JADE Machine Description:

Brewhouse made by Huppmann in year 2000, 410 hl/brew, with a mash filter, made by Nordon in year 1997. It is complete line, in good condition, not dismantled, it is possible to test the equipment. The brewhouse is controlled by PC.

Installed mash filter Nordon improves the performance of brewing process (compare to filter tank) and allows the use in the production low quality (dusty) malt and the filtration speed and quality do not change.

Capacity: mash tank - 410 HL/brew, malt 9 tn. per brew, 12 brews per day

Bottle neck is mash tank. Brewhouse capacity can be doubled by installation of second mash tank.

Address: Hämeentie 15 A, 3rd floor, 00500 Helsinki, Finland

VAT Number: FI21175221

List of equipment:

- Mash tank Huppmann, 410 hl, 4200 mm diameter, malt 9 tons per brew, capacity 12 brews per day, year 2002
- Mash tank heat exchanger, API SCHMIDT-BRETTEN type: Si 108 SBL, year 2000
- Ferments dosing system by ProMinent with 3 x 500 liter PVC tanks
- Mash filter Nordon, 53 plates, 1997
- Wort collecting tank, horizontal, 410 hl
- Wort kettle Huppmann, 930 hl, 5200 mm diameter, the heating boiler surface - 55 m², 2002.
Boiling of the wort runs at high pressure that allows to reach temperature of 104 – 106C,
- Hop dosing tanks, Huppmann 3 x 235 liters, year 1998
- Heat exchanger of wort kettle, APV type K55, year 1998
- Whirlpool Huppmann, 650 hl, diameter 5800 mm, year 2002
- Press-filter buffer tanks, Huppmann, 1999
- Tank for collecting protein
- Piping, pumps, valves, etc.
- Computer control system of brewhouse based on the PC
