JADE Machine Description:

Totally 9 units of excellent condition carton formers FORMECA CF-12 GT for sale. EX NOKIA Units. In manual packing lines of electronic industry these FORMECA CF-12 GT Carton Formers is designed to form side-glued corrugated cardboard boxes according to FEFCO 0212/E standard only (see attached picture). Ready cut plank cardboards are piled in to the feeding magazine manually and the machine bends, glues and inspects the result for quality by itself and rejects ready boxes on the out feeding belt. Box dimensions can be fine-tuned for correct size and cardboard thickness as indicated in the operation manual. The equipment has original documentation in English and they come with CE-certificates. On request operation video, pictures and technical specification of the machine.
