JADE Machine Description:

This Alfa Rollquatro labeler was installed in 2006 and it was operated time to time till 2014 total operating hours not exceeding 10 000 hours! Rollquatro is a rotary wraparound labeler equipped with an ergonomically designed, robust and precise linear labeling station with place for two rolls of film labels. Label is attached to bottle with two hot melt glue stripes. Label platforms are teathed belt driven via single servo motor. This labeler has HH2 configuration which enables improved flexibility in handling bottles of different sizes and greater reliability for small bottles at very high speeds. Labeler is still installed and powered and in good condition. Machine comes with Videojet label coding printer and Metec label inspector.

Gluing system	Hot Glue Stripes
Capacity	42000 bph
Carousel diameter	720 mm
Number of labeling stations	18
Bottle diameter	53 - 110 mm
Pitch	126 mm
Label min-max length	177 - 355 mm
Electric power	36 kW
In jet coder	Videojet 1620
Label inspector	Metec Promecon 2000
