

4512017 TECHNICAL MACHINE SHEET

Product: Fermenting Tank CCT 1920 hl Holvrieka / Landaluce
 Product number: 4512017
 Manufacturer: Holvrieka / Landaluce
 Tank type: Outdoor vertical
 Manufacturing year: 1998
 Volume gross/net: 1 920 / 1 536 hl
 Condition: Good

Pictures:

JADE Machine Description: Conical cone fermenting tanks (CCT) with gross capacity 1920 HL and net 1536 HL. All tanks are identical, two of them made by Hovrieka and two of them by Spanish Landaluia - all made in year 1998. Tanks are vertical outdoor type with 180 mm PU insulation, designed for seismic zone 2, supported from the bottom ring (no legs), with three (glycol) cooling zones, two on the side + cone. Tanks have mechanical cooling control as well as product handling valve system and outside on tank skirt, there are two sample taking valves. The cones has been refurbished / modernized by changing sample taking valve and adding level sensor. Generally tanks are in good condition and they have a high hygienic level.

Number of tanks	4 pcs
Insulation	PU 180 mm side and 230 mm in cone
Design pressure Holvrieka	1.5 bar + statistical pressure
Design pressure Landalucia	1.0 bar + statistical pressure
Design vacuum	300 / 500 mm Water Column
Cooling media	Glycol - water solution
Cooling zones	3 (including cone)
Tank inner diameter	5200 mm
Total height	11.7 m
Empty weight	17 000 kg with insulation
