JADE Machine Description:

The MP 100 Multipacker is a fully automatic machine to pack plastic, metal or glass containers in overwrapping cardboard sleeves. This machine has nominal capacity of 100 packs per minute, but the final capacity depends on desired packing format. Low or medium capacity containers can be packed in OTT (Over The Top) or NT (Neck Through) way, this machine has been packing 0.5 liter glass bottle in 4-pack over the top format. This MP model feature an electronic grouping system; the change-over operation is manual.

The packaging process takes place in continuous motion. In the pack formation zone products are grouped in the desired pattern upon which a thin cardboard blank is placed. A mechanical device gets two edges of the blank bent downwards and joined by hot-melt gluing beneath the container batch. This MP 100 has about 15 meter one line bottle feeding conveyor and 10 meter ready pack out feeding conveyor included. This machine has damaged local control panel which will be replaced before / after shipping by the seller.

Technical data:

Nominal capacity: 100 packs / minute
Serial no: PC08041 IS 1525
Electric connection: 15 kW / 400 V / 50 Hz

Address: Hämeentie 15 A, 3rd floor, 00500 Helsinki, Finland
Telephone: +358-50- 374 6777
