JADE Machine Description:

This one way KEG-filler was bought in May 2015 and it is almost unused. All the equipment are completely made in stainless steel. The machine has one sterilization/filling valve and the PLC of the machine is Siemens S7. Possible formats are 20 and 30 liter KeyKeg Baseline and Slimline. Other one way keg formats are possible with extra format parts. Filling volume is adjustable from 10 to 50 liters and the speed is 50-60 kegs per hour. Machine is completely CIPable, and even the air and CO2 pipes are CIPable with steam. An electro-pneumatic flow meter for measuring the beer volume is also included.
