JADE Machine Description:

This Monoblock is made by Eurostar in the year 2016. This has automatic rotary system to fill still liquids in large containers. Current set up is for 0.33 and 0.75 liter bottles with 26 and 29 mm crown cork. The opening of the filling valve is actuated by its contact with the neck-finish of the container raised by the supporting cylinder. The machine consists of a 12 valve vacuum filler and one capping head crown corker, and all the equipment are built completely in stainless steel. New BUSCH vacuum pump with a safety filter is installed to protect the pump from liquid, and CIP dummy bottles are also included.

Technical characteristics:

Cap formats: 26 mm and 29 mm crown corks
Control PLC: Siemens S7 PLC
Certification: CE

Address: Hämeentie 15 A, 3rd floor, 00500 Helsinki, Finland
